

ghost ^{montana} **WOOD**
A Bitterroot Valley Forest Product

-Reclaimed By Mother Nature-

History of Ghostwood

Since 1977, Bitterroot Valley Forest Products has created value through innovation. Our mission is to serve our customers with products that provide both a high level of performance and exceptional aesthetic appeal. Montana Ghostwood is an outstanding example of applying Bitterroot innovation to produce excellence.

With years of development behind it, Montana Ghost Wood delivers the distinctive look and character of reclaimed wood with the performance of new wood. Users enjoy ease of installation and reasonable pricing. It is an unmatched value.

Montana Ghost Wood is the perfect choice for the eco-conscious user. We strive to use SFI and FSC certified lumber, beetle-kill

and forest fire-kill lumber. In this respect, our Montana Ghost Wood product has truly been "reclaimed by Mother Nature."

Bitterroot Valley is constantly working on "green" and sustainable practices. Montana Ghost Wood includes the use of eco-friendly finishes that have proven themselves as both "green" and effective for over 60 years. "Green" principles are at work from the creation of Montana Ghost Wood to the recycling of all of our shavings, chips and sawdust into animal bedding and compost.

"Green" from start to finish, quality throughout. That is the difference only Montana Ghost Wood can deliver.

Benefits

- **Little to NO Maintenance** – Our patent pending process uses an eco-friendly finish that will continue to weather more over time when exposed to UV light, moisture and inclimate weather.
- **Exact Specs** – We can cut to exact sizes required, resulting in very little waste of product when installed.
- **Little to No Defects** – We cull defective boards at each step through the process. In comparison, 30-70% of reclaimed wood ends up being un-usable due to rot, splits, and defects.
- **Half the Price** – Our Ghost Wood product resembles the look of reclaimed wood at a cost of approximately half the price.*

* Price estimates are approximate and are not guaranteed.

Environmentally Sensitive

- **Reclaimed by Mother Nature** – A large majority of our timber comes from standing dead beetle kill or forest fire killed timber.
- **Recycle Waste** – All shavings, chips, and sawdust are bagged and recycled into bedding or compost for local farms and ranches.
- **Certified Wood** – A high percentage of our timber comes from FSC and SFI certified sawmills. Ensuring ethical logging practices.
- **Big Blackfoot Chapter of Trout Unlimited** – A portion of our profits are donated to restore the Blackfoot River watershed and its fishery in partnership. Their restoration projects range from stream restoration, grazing management, riparian revegetation, fish screen and instream flow projects.
- **Ghost Town Preservation** – A percentage of our profits are donated to Montana Ghost Town Preservation Society and Garnet Preservation Association.

Inventory Items

Please contact your local distributor for a list of current, in-stock inventory items.

Custom Items

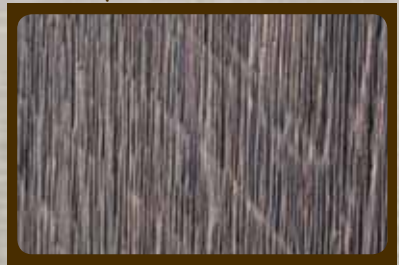

1. 1" x 4" through 2" x 12"
2. Timbers up to 20" x 20"
3. Any pattern or profile available (WWPA patterns)
